PROJECT

1. Coin Collector Game :

It is basically a side scrolling game built with Java Swing. The player in this game will run ,collect coins, face the obstacles with limited lifetimes.

2. Post Hospital Health Monitoring App:

It is an android app built in android studio to help to monitor the patient after discharge.Doctor can easily monitor whether the patient has taken medicines or not. The app will build a connection between doctor and patient. It is programmed in Java.

3. Student Management System:It is a project for understanding database management systems built with mysql and python. In this project ,we can store student's data ,delete students and update the data.

4. Bangla Handwritten OCR:

It can convert any image of handwritten text into editable text. The project is ongoing.It involves machine learning, image processing.It is a machine learning project.

5. Personal Project:

I have some personal projects like django projects, python projects and some mobile and web applications. The projects helped me a lot for practising some skillset.
